Petition to The Warehouse: please stop selling SodaStream products

- Until October 2015 SodaStream operated in the occupied West Bank in direct violation of international law.
- SodaStream's new factory in the Negev profits from Israel's expulsion of Palestinian Bedouin from their land and natural resources.

As people and groups who care about human rights, we call on The Warehouse to refuse to be complicit in violations of Palestinian rights and to stop selling SodaStream products.
